

HCI Research Internship: A Summer at Mozilla

Presented by Jessica Colnago, CMU

Abstract:

In this short presentation I'll give an overview of research at Mozilla. I'll cover both their research infrastructure in general, some topic areas specific to the area of privacy and security, as well as my personal experience working within the Emerging Technologies group. Please bring your questions about the company, doing industry research, and any other related topics you may think of.

Bio:

Jessica Colnago is a 3rd year PhD student in Societal Computing at Carnegie Mellon University. She holds a masters in Computer Science (HCI focus) and a bachelor in Computer Engineering from the Federal University of São Carlos, Brazil. She is generally interested in understanding how human behavior impacts use and design of new technologies, in particular behaviors associated with privacy. Starting in the 2018/19 academic year, Jessica is a Facebook Emerging Scholar.
