

So, What Does a Privacy Engineer Do?

By Pranshu Kalvani, Google

Abstract:

This talk tries to encompass practical aspects of Privacy Engineering in the corporate world. Like most stories it comprises of three acts: the domains, the conflicts, and the resolutions. Each is a deep dive into the real world experiences from the presenter's point of view; each meant to inform and educate about the different facets of this increasingly critical career."

Bio:

Pranshu Kalvani is a Technical Program Manager at Google and works on strategic programs within the Security and Privacy team.

He graduated from the inaugural class of Privacy Engineers here at Carnegie Mellon University. After which he went on to lead the Revenue Recognition engineering team at Oracle Data Cloud - a collection of acquired AdTech startups, before joining Google.

Speaking in third person suits his personality.
